

Sprint backlog

Patrick Soliman | May 19, 2021

User story

As a user, I want to search for movies/tv shows using the title name so I can read the synopsis

Create show/movie table in database

Assign primary and/or foreign keys to attribute

As a user, I want to add written reviews to movies/tv shows, so I can advise other users of what I thought of the movie

Create account table in database

Link a relationship between account and tv show/movie table

As a user, I want to search for a movie/tv show and be able to find details on the movie like who played what characted, production company, etc.

Add attributes to tv show/movie table

Allow end users access to view tv show/movie table

As a user, I want to create an account so I can create a watchlist of movies/tv shows I want to see

Add attributes to account table

Allow end users to create a watchlist

As a user, I want to be able to create an account and leave ratings in forms of a star system for movies/tvs shows

Alllow end users to leave rating in the form of stars for tv shows/movies

Calculate the average rating for tv show/movies and have a visible display for end users

As a user, I want to search for movies by genre so I can find movie recommendations according my genre preference

Allow users to filter for movies via genre

Adjust preferences according ot users watch history

As a user, I want to find a character through a movie, and select the person who plays that character to see more of their work

Create a person datsbase that stores an actors entire discography

Allow users an option to select an actor from a movie and via more of his/her discography
