Sprint backlog

User story

As a user, I want to add written reviews to movies/tv shows, so I can advise other users of what I thought of the movie.

Link accounts and movies/tv shows table in database

Grant users access to leave reviews

Test user functionality to leave reviews

As a user, I want to be able to create a MovieMad account, so I can access all user functionality.

Create account table in database

Grant access to user functionality

Test to see if user functionality access has been successful

As a unregistered user, I would like to view movies and info without an account, so that I can quickly look up info without the annoyance of signing up.

Allow unregitered users access to movie/tv show information

Test unregsitered user access

As a user, I want to see images related to my search so that I can easily pick from what I want

Upload images to MovieMad in relation to movie/tv show

Make images visible while searching for a movie/tv show

Test if images appear while searching for movies/tv shows

As an Admin user, I want to review all movies/shows so that I remove them if they are not legitimate

Allow admins to review all non-admin user reviews

Test if admins can remove non-legitimate reviews

As an Admin user, I want to review all movies/shows so that I can edit their details

Allow admin users access to all movie/tv show data

Allow admin users access to edit all movie/tv show data

Test admin access to movie/tv show data

As an Admin user, I want to view all account requests from users so that I can accept or reject them.

Set all new accounts into a 'pending' state

Allow admin users access to review accounts in a 'pending' state

Test if admins have access to review accoutns in a 'pending' state

As an Admin user, I want to accept/reject shows so that they are visible/not visible to other users

Allow admin users access to change the visibility of shows

Test if admin users have access to chance the visibility of shows

To view more information about the user stories (priority, assignee etc., view the clickup screenshots)
